

Medically approved switch mode power supplies.

PowerPax UK offer two ranges of high quality medically approved switch mode power supplies which, thanks to new automated production processes and an increase in production quantities, they can now offer at even more aggressive prices.

The TRC-M range of medically approved plug top power supplies give a maximum of 16W of continuous output power. The units can be provided as UK, European, USA or Australian models by way of the patented changeable AC input plugs.

The DUT series are medically approved desktop switch mode power supplies offering 28 – 45 watts of continuous output power. They come with the option of either 2 or 3 pin IEC inlets and a wide range 90- 264vac input for world use.

The DUT units measure 106 x 54.5 x 36.8mm and weigh 250g

The TRC-M units measure 78.3 x 4.7 x 26.6mm and weight just 140g.

All units are 100% burned in and approved to IEN 60601-1 and UL 2601. Output voltages offered as standard are 3vdc to 24vdc.

PowerPax UK also offer a comprehensive range of fully approved, aggressively priced standard switch mode and linear power supplies.
